INDEX TO VOLUME LXI

ADRENAL discharge, production of, by piqûre, 254.

Adrenalectomy, effect of, on metabolism of cat, 326, 349.

Adrenalin, effect of, on muscular fatigue, 475.

Adrenin, further evidence for reflex and asphyxial secretion of, 215.

Alkaline reserve of fish, effect of environment on, 380.

Alkaligenesis in tissues, 244.

"All-or-none" principle applied to mammalian nerve, 228.

Amino-acids in nutrition, 1.

Ammonia production in muscle during contraction, 244.

Arbacia eggs, action of ultra-violet rays on, 272.

ARNOLD, L. See KING, ARNOLD and CHURCH, 80.

AUB, J. C., E. M. BRIGHT and J. URIDIL. Studies upon the mechanism of the increased metabolism in hyperthyroidism, 300.

——, E. M. BRIGHT and J. FORMAN. The metabolic effect of adrenalectomy upon the urethanized cat, 349.

——, J. FORMAN and E. M. BRIGHT. The effect of adrenalectomy upon the total metabolism of the cat, 326.

BASKERVILL, M. L. See LILLIE and BASKERVILL, 57, 272.

BLAIR, E. See GESELL, BLAIR and TROTTER, 399.

Blood anticoagulant obtained from body tissues, 42.

—— catalase, effect of high protein diet on, 574.

—— pressure in man, pulse rate and, 429.

Blood volume, relation of, to tissue-nutrition, 399, 412, 420.

BRIGHT, E. M. See AUB, BRIGHT and FORMAN, 349.

——. See AUB, BRIGHT and URIDIL, 300.

——. See AUB, FORMAN and BRIGHT, 326.

BURGE, W. E. and J. M. LEICHSENRING. The effect of a high protein diet on the blood catalase, 574.

BURTON-OPITZ, R. A comparative study of the different methods of artificial respiration, 562.

BYRNE, J. Preliminary dilatation a phase of the pupillary light reflex, 369.

——. Pseudo-paradoxical pupil-dilatation following lesions of the afferent paths, 93.

CAMERON, H. G. See TAYLOR and CAMERON, 385.

CANNON, W. B. and R. CARRASCO-FORMIGUERA. Studies on the conditions of activity in endocrine glands. XI. Further evidence for reflex and asphyxial secretion of adrenin, 215.

Capillaries, physiology of, 528.

Cardia, innervation of, 14.

Cardiac acceleration, voluntary, 385.

—— impulse, origin and conduction of, 117, 130.

—— volume in dogs, 501.

CARLSON, A. J. Studies on the visceral sensory nervous system. XIII. The innervation of the cardia and the lower end of the esophagus in mammals, 14.

Carrasco-Formiguera, R. The production of adrenal discharge by piqûre, 254.

——. See Cannon and Carrasco-Formiguera, 215.

Carrier, E. B. Studies on the physiology of capillaries. V. The reaction of the human skin capillaries to drugs and other stimuli, 528.

——, F. W. Lee and G. H. Whipple. I. Determination of plasma and hemoglobin volumes after unit hemorrhages under controlled experimental conditions, 138.

——. See Lee, Carrier and Whipple, 149.

Catalase, blood, effect of high protein diet on, 574.

Cell division, studies of, 505.

Center of gravity, height of, in man, 171.

Church, J. G. See King, Arnold and Church, 80.

Clark, J. H. The action of ultraviolet light on egg albumin in relation to the isoelectric point, 72.

Coombs, H. C. The mechanism of the regulation of intra-abdominal pressure, 159.

Croskey, M. I., P. M. Dawson, A. C. Luessen, I. E. Marohn and H. E. Wright. The height of the center of gravity in man, 171.

Dawson, P. M. See Croskey, Dawson, Luessen, Marohn and Wright, 171.

Diet, high protein, effect of, on blood catalase, 574.

Dilatation, preliminary, a phase of the pupillary light reflex, 369.

Dorst, S. See Mills, Mynchenberg, Guest and Dorst, 42.

Drugs, protoplasmic effect of, 551.

Ductless glands of rats, effect of excitement on, 203.

Echinarachnius parma, effect of dilute sea-water on fertilized egg of, during cleavage cycle, 505.

—— ——, fertilization reaction in, 516.

Edestin, nutritive value of, 1.

Endocrine glands, conditions of activity in, 215.

Esophagus, innervation of, 14.

Exercise, fluids by mouth and, influence of, on plasma and hemoglobin volumes, 149.

Eyster, J. A. E. and W. J. Meek. Studies on the origin and conduction of the cardiac impulse. VIII. The permanent rhythm following destruction of the sino-auricular node, 117.

—— —— ——. Experiments on the origin and conduction of the heart beat. IX. Sino-ventricular conduction, 130.

Eyster, J. A. E. See Meek and Eyster, 186.

Fatigue, studies in, 475.

Fluids by mouth and exercise, influence of, on plasma and hemoglobin volumes, 149.

Forman, J. See Aub, Bright and Forman, 349.

——. See Aub, Forman and Bright, 326.

Fundulus, responses of, to white, black and darkness, 548.

Gesell, R. On the relation of blood-volume to tissue-nutrition. II. The effects of graded hemorrhage on the volume-flow of blood through the striated muscle of the dog, 412.

III. The effects of hemorrhage and subsequent intravenous injection of gum-saline solution on the response of striated muscle to rapid stimulation with supplementary data on the effects of hemorrhage and

infusion on salivary secretion elicited by intravenous injection of pilocarpin, 420.
——, E. Blair and R. T. Trotter. On the relation of blood-volume to tissue-nutrition. I. The effects of hemorrhage on the circulatory and respiratory response to changes in the percentage of oxygen and carbon dioxide in the respired air, 399.
Glands, ductless, effect of excitement on, 203.
Growth, relative, of individual Boston school boys, 311.
Gruber, C. M. Studies in fatigue. XI. The effect of intravenous injection of massive doses of adrenalin upon skeletal muscle at rest and undergoing fatigue, 475.
Guest, G. M. See Mills, Mynchenberg, Guest and Dorst, 42.

Haggard, H. W. and Y. Henderson. The influence of hydrogen sulphide upon respiration, 289.
Heart, effect of plethora and venous pressure on, 186.
——, voluntary acceleration of, 385.
Hegner, R. W. The effects of prostate substance on the metamorphosis of the intestine of frog tadpoles, 298.
Hemoglobin, plasma and, volumes, 138, 149.
Hemorrhage and response to low oxygen pressures, 399.
—— —— volume-flow of blood, 412.
——, infusion and muscular contraction, 420.
Hemorrhages, unit, effect of, on plasma and hemoglobin volumes, 138.
Henderson, Y. See Haggard and Henderson, 289.
Hopkins, H. S. Protoplasmic effects of papaverine, histamine and other drugs, in relation to the theory of smooth muscle contraction, 551.
Hydrogen ion concentration of human sweat, 403.
Hydrogen sulphide, influence of, on respiration, 289.
Hyperthyroidism, increased metabolism in, 300.

Innervation of cardia and esophagus in mammals, 14.
Intestinal mucosal movements, 80.

Just, E. E. Studies of cell division. I. The effect of dilute sea-water on the fertilized egg of Echinarachnius parma during the cleavage cycle, 505.
——. The fertilization-reaction in Echinarachnius parma. V. The existence in the inseminated egg of a period of special susceptibility to hypotonic sea-water, 516.

King, C. E., L. Arnold and J. G. Church. The physiological rôle of the intestinal mucosal movements, 80.

Lanchner, A. J. See Parker and Lancher, 548.
Lee, F. W., E. B. Carrier and G. H. Whipple. II. Simultaneous determinations of plasma and hemoglobin volumes. Influence of fluids by mouth and vigorous exercise, 149.
——. See Carrier, Lee and Whipple, 138.
Lee, O. P. and S. Tashiro. Studies on alkaligenesis in tissues. II. Ammonia production in muscle during contraction, 244.
Leichsenring, J. M. See Burge and Leichsenring, 574.
Light, ultraviolet, action of, on egg albumin, 72.
Lillie, R. S. and M. L. Baskervill. The action of ultra-violet rays on Arbacia eggs, especially as affecting the response to hypertonic sea-water, 272.
—— —— ——. The action of ultra-violet rays on starfish eggs, 57.

LUESSEN, A. C. See CROSKEY, DAWSON, LUESSEN, MAROHN and WRIGHT, 171.

McCLENDON, J. F. Calcium phosphate metabolism in the diagnosis of rickets, 373.
MAROHN, I. E. See CROSKEY, DAWSON, LUESSEN, MAROHN and WRIGHT, 171.
MEEK, W. J. and J. A. E. EYSTER. The effect of plethora and variations in venous pressure on diastolic size and output of the heart, 186.
——. See EYSTER and MEEK, 117, 130.
Metabolism, calcium phosphate, in the diagnosis of rickets, 373.
——, increased, in hyperthyroidism, 300.
—— of cat, effect of adrenalectomy on, 326, 349.
Metamorphosis of tadpole after prostate feeding, 298.
MILLS, C. A., G. MYNCHENBERG, G. M. GUEST and S. DORST. A blood anticoagulant obtained from body tissues; its chemical nature and its manner of action, 42.
Muscle, ammonia production in, during contraction, 244.
Muscles, antagonistic, latent period in response of, 106.
Muscular contraction, hemorrhage, infusion and, 420.
—— fatigue, effect of adrenalin on, 475.
MYNCHENBERG, G. See MILLS, MYNCHENBERG, GUEST and DORST, 42.

NERVE, mammalian, "all-or-none" principle applied to, 228.
Nervous system, visceral sensory, 14.
Nutrition, amino-acids in, 1.

OLMSTED, J. M. D. and W. P. WARNER. Latent periods in the reciprocal action of antagonistic muscles, 106.
OLMSTED, J. M. D. and W. P. WARNER. The "all-or-non" principle applied to mammalian nerves and reflex-arcs, 228.
Oxygen pressure, low, hemorrhage and response to, 399.

PARKER, G. H. and A. J. LANCHNER. The responses of fundulus to white, black and darkness, 548.
Piqûre, production of adrenal discharge by, 254.
Plasma and hemoglobin volumes, 138, 149.
Plethora and venous pressure, effect of, on heart, 186.
PORTER, W. P. The relative growth of individual Boston school boys, 311.
POWERS, E. B. The alkaline reserve of the blood of fish in relation to the environment, 380.
Pressure, intra-abdominal, regulation of, 159.
Prostate feeding, metamorphosis of tadpole after, 298.
Protoplasmic effect of drugs, 551.
Pulse rate and blood pressure in man, 429.
Pupil-dilatation, pseudo-paradoxical, following lesions of the afferent paths, 93.
Pupillary light reflex, preliminary dilatation a phase of, 369.

RAYS, ultra-violet, action of, on Arbacia eggs, 272.
Respiration, artificial, spirometer tests of, 562.
——, influence of hydrogen sulphide on, 289.
Rhythm, permanent, following destruction of sino-auricular node, 117.
Rickets, calcium phosphate metabolism in the diagnosis of, 373.

SCHNEIDER, E. C. and D. TRUESDELL. A statistical study of the pulse rate and the arterial blood

pressures in recumbency, standing, and after a standard exercise, 429.
Sino-auricular node, permanent rhythm following destruction of, 117.
Sino-ventricular conduction, 130.
SKAVLEM, J. H. Estimation of cardiac volume in the living animal by means of the teleroentgenogram, 501.
Spirometer tests of artificial respiration, 562.
Stimuli, reaction of human skin capillaries, to, 528.
SURE, B. Amino-acids in nutrition. V. Nutritive value of edestin (globulin from hemp seed), cystine and lysine as growth-limiting factors in that protein, 1.
Sweat, human, hydrogen ion concentration of, 403.

TALBERT, G. A. Further studies on the hydrogen ion concentration of human sweat, 493.
TASHIRO, S. See LEE and TASHIRO, 244.
TAYLOR, N. B. and H. G. CAMERON. Voluntary acceleration of the heart, 385.
Tissue-nutrition, relation of blood-volume to, 399, 412, 420.
Tissues, alkaligenesis in, 244.
——, body, blood anticoagulant obtained from, 42.
TROTTER, R. T. See GESELL, BLAIR and TROTTER, 399.
TRUESDELL, D. See SCHNEIDER and TRUESDELL, 429.

ULTRAVIOLET light, action of, on egg albumin, 72.
—— rays, action of, on starfish eggs, 57.
UNO, T. Effect of general excitement and of fighting on some ductless glands of male albino rats, 203.
URIDIL, J. See AUB, BRIGHT and URIDIL, 300.

VENOUS pressure, effect of plethora and, on heart, 186.
Visceral sensory nervous system, 14.
Volume-flow of blood, hemorrhage and, 412.

WARNER, W. P. See OLMSTED and WARNER, 106, 228.
WHIPPLE, G. H. See CARRIER, LEE and WHIPPLE, 138.
——. See LEE, CARRIER and WHIPPLE, 149.
WRIGHT, H. E. See CROSKEY, DAWSON, LUESSEN, MAROHN and WRIGHT, 171.
